

PJSC "Kupyansk Canned-Milk Integrated Plant"

PJSC "Kupyansk Canned-Milk Integrated Plant" comprises the unique complex including three technological shops situated on one production site: shop of canned condensed milk with sugar, shop of whole-milk products with sectors for manufacture of sweet cream butter, ultra high-temperature treated milk and curd products, shop for manufacture of dry milk products. Within 55 years, the Enterprise production capacity for milk processing increased to 600 t of milk per day.

Condensed milk in several kinds of packaging: tin can and Doy-pack with a wide range of products. Offer to the consumer what he wants.

Condensed milk in inexpensive, convenient chub-pack packaging is a modern alternative to tin and plastic pails for confectionery and culinary shops in HoReCa segment. You pay for the product but not for expensive containers.

UHT (ultra high-temperature treated) milk comprises a natural milk and the innovation technologies used for retention of its useful properties in case of durable storage. The barrier characteristics of packing material and aseptic conditions of filling make it possible to store such milk for 6 months without use of low-temperature storage mode.

Dry milk products – all the useful present in cow milk is left in the dry residue. We offer whole milk powder and skimmed milk powder. Since 2014, we also offer instant dry milk products.

Sweet cream butter - in 20 kg monoblocks and 200 g polyfoil consumer packaging. The butter is only produced of fresh cow-milk pasteurized cream.

Our advantages:

90% of milk is supplied to the Integrated Plant by dairy farms

The most wide range of condensed milk in Ukraine

The tin can has a protection against counterfeit – stamp on can lid.

Different kinds of packaging according to customer's wish

Majority of the milk products are manufactured according to the State Standards of Ukraine.
